Technical Projects

Entertainment Galore • JavaScript, React, JSX, Fetch API

- Developed a fully functional web application using React, JSX, and JavaScript, enabling users to search and explore a vast library of movies, games, and TV shows.
- Integrated the Fetch API to seamlessly retrieve data from the omdbapi and provide users with comprehensive entertainment options.

Weather App • JavaScript, JSX, React, Axios

- Created a user-friendly Weather App using React, JSX, and JavaScript, delivering real-time weather information for any city.
- Leveraged Axios to integrate the OpenWeatherApi, displaying accurate temperature, wind speed, humidity, and weather conditions.

Blackjack • JavaScript, React, JSX, Axios, DOM Manipulation

- Implemented a web-based version of the popular Blackjack card game using JavaScript, React, JSX, Axios, and DOM manipulation techniques, providing an immersive gaming experience.

Passenger Counter App • JavaScript, HTML, CSS, DOM Manipulation

- Developed a simple yet intuitive counting application using JavaScript, HTML, CSS, and DOM manipulation, enabling users to simulate passenger counting scenarios and save the results conveniently.

Chrome Extension Lead Tracker • JavaScript, HTML, CSS, DOM Manipulation

- Designed and implemented a feature-rich Chrome extension using Vanilla JavaScript, HTML, and CSS, allowing users to effortlessly save and manage links to their favorite websites.

Skills

Web Development · Problem Solving and Debugging

Frontend: HTML · CSS · Javascript · React

Backend: Node.js
